Ex-d Motion detector EFS MS

Light metal design, explosion-protected for Zone 1 and Zone 21

For use under harsh and hazardous conditions

The flameproof motion detector made of light metal are suitable for use in hazardous areas of zones 1, 2, 21 and 22. With its robust light metal housing of the EFS series with borosilicate glass viewing window, use in harsh environmental conditions is no problem.

With its 400 VA switching capacity, the motion detector is suitable for the demand-oriented control of even large lighting equipment in hazardous areas. The 3-pole terminal strip has pluggable clamp terminals with a connection cross section of up to 1.5 mm².

The high degree of protection IP 67 allows universal use in Ex areas.

Various cable and line ducts, conduits or flameproof cable glands, can be realized.

Drilled holes, cable and line ducts, through which no lines are conducted, should be sealed with certified screw plugs.

The housing is provided with an external earthing connection.
